

APTUSTM
Win the mental game.

Ground breaking APTUS Discovery™ predicts success and offers invaluable, unbiased insight to how a person learns.

Innovation

The APTUS Discovery™ is a paradigm shift. APTUS couples advancements in Technology and Behavioral Science on a tablet based platform. In roughly 25-35 minutes, our set of ten hands-on engaging, innovative and dynamic exercises result in an unbiased, objective set of reports that show *how* a person learns and mentally performs; *how* they Define, Process and Execute instruction and information across various contextual environments. Unlike static tests, surveys or opinion questionnaires, our Behavioral Science vetted APTUS Discovery measures *how* one learns—while learning is actually occurring; in real time.

APTUS Discovery™

- Gets the Bottom Line Up Front (BLUF); saves time
- Maximizes talent, minimizes risk
- Compare features; analytics
- Provides Developmental Strategies

Interactive APTUS Assessment™

- Dynamic and technology based; measuring learning as it occurs
- Unbiased, objective, free from human interference
- User friendly, tablet-based platform
- Vetted and researched by Behavioral Science and Leadership Professionals

right examples of the APTUS reports

Why APTUS?

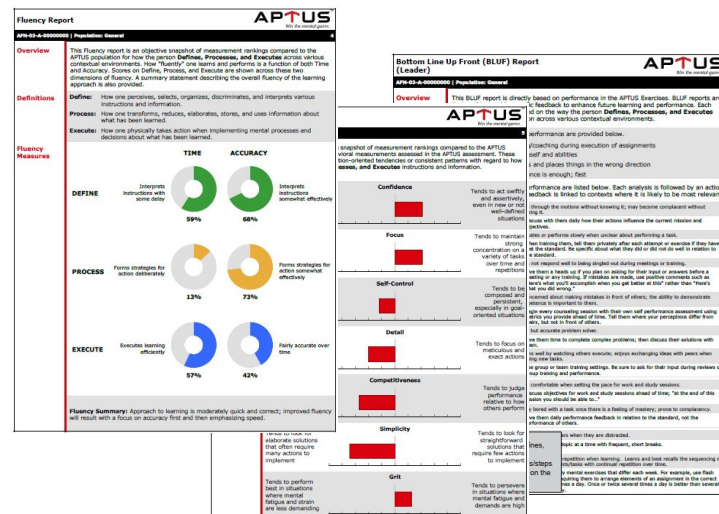

The APTUS Discovery is today's competitive edge. This is the most unique generation that the world has ever known. By objectively and dynamically showing how they learn, we can "Win The Mental Game"

- Dynamic and engaging; no multiple choice questions, requires active participation
- Unlocks mental barriers and wins the mental game
- No test anxiety; very game-like and interactive
- Measures how someone learns while learning is occurring
- Immediate reporting with Development Strategies
- Far-reaching applications; provides reporting geared to develop the individual

Why APTUS Matters

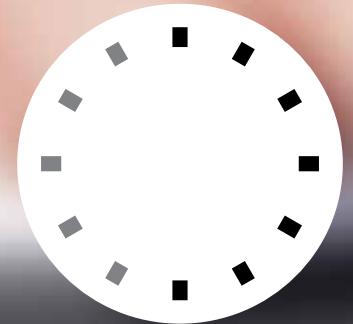

- Effective learning drives performance
- Objective feedback on how we actually learn is rare
- Continuous learning is the new reality
- Cognitive, perceptual, & behavioral skills underlie effective learning
- Observable vs. self-reporting; removes human bias

APTUS' Fluency, Propensity and BLUF reports summarize and provide development strategies of the 65 distinct cognitive, perceptual & behavioral attributes measured

30 minutes

on a tablet based platform

10 exercises

that require active participation

1 objective set of reports

will show how a person learns and about how they Define, Process and Execute instruction and information
